Integral Systems Integrated With KOREASAT-6

Integral Systems, Inc., (NASDAQ: ISYS) has signed a contract with Orbital Sciences Corporation to provide the KT Corporation with primary and backup satellite command and control systems for *KOREASAT-6*, a *STAR* satellite built by Orbital with Thales Alenia Space France acting as prime contractor.

KT Corporation, a premier satellite communications company in the Asia Pacific region, will be the 29th ***GEO*** communications satellite owner using *Integral Systems' EPOCH Integrated Product Suite (IPS)* software to ensure safe and efficient satellite operations. ***KOREASAT-6*** is the 12th **Orbital** satellite supported by Integral Systems. Under the terms of the contract, Integral Systems will provide an integrated solution leveraging its complete EPOCH IPS as well as

the *Compass* software products of its subsidiary, **Newpoint Technologies**. EPOCH IPS is used by operators worldwide to support real-time and historical telemetry processing, commanding, data archiving, retrieval and display, and flight dynamics for both individual satellites and fleets, regardless of manufacturer. Newpoint Technologies' *Compass* suite provides network and equipment management solutions for data, Internet, satellite, broadcast, telecom, and hybrid network applications.
